---

## HOW DID I DO?

Vinification is the same on my 2 Pet Nats:

- \* handpicked grapes end of august
- \* direct press with the whole bunches
- \* skin contact 10-24 hours
- \* 100 % spontaneously fermentation
- \* the still fermenting juice was filled into a pressure bottle
- \* 8 months on the yeast
- \* shake it
- \* disgorged it on my own

0 additons. 0 sulfur.

don't think, just drink.
